

# LEGO MASTERS

This Game Show Challenge is Tribe v Tribe. Tribes will sit/stand around a table with a pile of Lego blocks in the centre. An image will be displayed for both tribes to see (the same image for each tribe). Tribes have one minute to look at the image, memorise and work out in their tribe how they are going to replicate/create the image with the Lego blocks. During this time, the tribes can start building, however, once the minute is done, the image is taken away and the tribes cannot see the image again until the time is up. Each tribe then has the rest of the rotation to continue to build the image with the Lego blocks.

Points will be given for colour, likeness, originality and an overall winner.

**NOTE:** Tribes may draw the image as a reference point, however, this **cannot** be done until the image is no longer in front of them.

**Scoring:** The winner will receive 15 points. Colour, likeness and originality will be scored from 0-10.

**Location:** *Dining Hall Balcony*

## ***How to play the game:***

In a moment, everyone is going to see an image. With your tribe you will need to re-create the image with the Lego blocks on your table. You have 1 minute to study the image before it is removed, you cannot see the image again until time is up. You may draw the image but only after the image has been removed after 1 minute. You are allowed to start building your Lego during this time and will have the rest of the rotation to finish your creation.

Points are given for different colours used, likeness to the image and originality in your creation. There will also be points given to the tribe with the overall best representation of the image.
